

Who We Are

SONA Networks, LLC provides services to State and Federal as well as Commercial clients supporting critical IT environments. We provide robust, scalable, and secure IT solutions for clients with business-critical networks and systems. Our network experts design, install, troubleshoot, and manage networks to improve the performance and resiliency of the client's IT infrastructure. Our software experts develop applications to meet the client's business objectives. We develop Disaster Recovery Plans to mitigate the risk of system and service unavailability by providing written and cost-effective contingency solutions. Our telecommunication experts add efficiency and reliability to the client's Voice network. Our project management experts manage complexity and change in the client's environment.
